

MAYANK DEMBLA

Software Developer

 dembla.mayank@outlook.com

 +1 (913)-203-7878

 Kansas, KS 66213

 [mayankdembla.github.io](https://github.com/mayankdembla)

Professional Summary

- Experienced Software Developer:** Over 7 years of expertise in designing, developing, and maintaining web-based, enterprise, client/server, and distributed applications using Java, J2EE, Node.js, and Python. Proficient in building robust back-end architectures, RESTful micro-services, and scalable cloud-native solutions. Adept in implementing design patterns, optimising performance, and delivering user-centric solutions across diverse domains.
- Backend and Cloud Proficiency:** Skilled in developing RESTful micro-services, event-driven architectures, and scalable back-end systems using Spring Framework. Expertise in designing and deploying on-premises and cloud solutions leveraging AWS (EC2, S3, RDS, Lambda), PCF, GCP, and Azure. Experienced in implementing containerisation and orchestration tools like Docker and Kubernetes for efficient cloud-native development.
- Front-End and Database Expertise:** Hands-on experience in building MVC-based Single Page Applications (SPAs) with Angular, React, and Node.js, as well as server-side rendering with Thymeleaf, JSP and Spring MVC. Proficient in managing and optimising relational and NoSQL databases, including SQL, PL/SQL, Oracle, MySQL, MongoDB, Cassandra, and SQL Server. Skilled in integrating distributed systems using messaging and streaming platforms like Apache Kafka, ensuring high availability and scalability.
- DevOps and CI/CD:** Adept in using Git, GitLab, and Bitbucket for version control and automating development pipelines for efficient CI/CD deployments. Proficient in leveraging tools like Jenkins for build automation and Terraform for implementing Infrastructure as Code (IaC). Experienced in monitoring and performance optimisation using Datadog and Dynatrace, ensuring streamlined deployments, operational efficiency, and system reliability in DevOps workflows.
- AI, ML & Data Science:** Experienced in user behaviour analysis research using machine learning models, including Large Language Models (LLMs). Proficient in data analysis, visualisation, and exploratory data analysis (EDA) using tools like Pandas, NumPy, Matplotlib, Seaborn, and Plotly. Skilled in building and deploying predictive models for user segmentation, personalisation, and behaviour prediction. Familiar with deep learning, NLP, reinforcement learning, and data preprocessing for effective model training and evaluation. Adept at utilising ML frameworks such as TensorFlow, PyTorch, and Scikit-Learn to derive insights from large datasets and create actionable visualisations.

Technical Skills

Languages	Java, J2EE, C, Python 3.6+, Node.js, R, JavaScript (ES6+), TypeScript, SQL, Shell Scripting (Bash), Groovy, Ruby, Kotlin
Web Technologies	SERVLETS 3.1, JSP 3.0, JavaBeans 3.0, Java Servlet API 3.0, Spring Boot, Spring MVC, Thymeleaf, Hibernate, RESTful APIs, WebSocket, HTML5, CSS3, JavaScript (ES6+), Bootstrap, AJAX, JSON, jQuery, XML, JSP, Web Services, SOAP, Tomcat, Jetty, Apache HTTP Server.
AI & ML	TensorFlow, Keras, PyTorch, Scikit-Learn, XGBoost, LightGBM, Hugging Face Transformers, OpenAI GPT, SpaCy, NLTK, Gensim, AllenNLP, Apache Kafka (for stream processing), MLflow, DVC (Data Version Control), RapidMiner, Orange.

Data Science	Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Tableau, Jupyter Notebooks, Apache Spark, Dask, SciPy, Statsmodels, SQL, Hive, PySpark, AWS Sagemaker, Google AI Platform, Microsoft Azure Machine Learning, Google Colab.
Environment	Client/Server, Distributed Computing, Cluster Computing, Mainframes, Time-sharing computing Environment, Grid-computing.
Databases	<p>SQL Databases: IBM DB2, Oracle, Microsoft SQL Server, MariaDB, MySQL, AWS Aurora, PostgreSQL, SQLite, Google Cloud SQL, Amazon RDS, Snowflake, Apache HBase.</p> <p>NoSQL Databases: MongoDB, AWS DynamoDB, Cassandra, Redis, Elasticsearch, CouchDB, Neo4j, Firebase, Apache Cassandra, Amazon DocumentDB, Azure Cosmos DB.</p> <p>Cache Technologies: Redis, Memcached, Amazon ElastiCache, Hazelcast, Varnish, Nginx (as reverse proxy caching).</p>
Messaging Queues	Apache Kafka, RabbitMQ, ActiveMQ, Amazon SQS, Kafka Streams, AWS Kinesis, Google Cloud Pub/Sub, Azure Service Bus, NATS
Identity & Security	Spring Security, Okta, Keycloak, Apigee, Syncope, OAuth 2.0, OpenID Connect, SAML, JWT, Multi-Factor Authentication (MFA), User Federation, API Security, Role-Based Access Control (RBAC), Identity Federation.
Build Tools	Ant 1.10, Maven 3.3.9, Gradle 3.4.1
Cloud Environments	Azure, AWS, GCP, Netflix Eureka, Mesos, Spring Cloud, Docker, Kubernetes.
Cloud Services	<p>AWS Cloud Services & Serverless: AWS Lambda, API Gateway, AWS Step Functions, AWS S3, DynamoDB, EC2, RDS, Elastic Beanstalk, Elastic Load Balancer, CloudFormation, AWS Fargate.</p> <p>GCP Cloud Services & Serverless: GCP Cloud Functions, Google Cloud Storage, Firebase, Google App Engine, Google Kubernetes Engine (GKE), Google Cloud Run, Cloud Pub/Sub.</p> <p>Azure Cloud Services & Serverless: Azure Functions, Azure Blob Storage, Azure Logic Apps, Azure App Service, Azure Kubernetes Service (AKS), Azure Event Grid, Azure Service Bus.</p>
Deployment Tools	Terraform, Terraform Templates, Jenkins, TeamCity, Harness, GitLab CI/CD, GitHub Actions, Docker, Kubernetes, Ansible, Chef, Puppet, Infrastructure as Code (IaC), Code as Infrastructure, Continuous Integration/Continuous Deployment (CI/CD), AWS CloudFormation, Azure DevOps, CircleCI, Helm, Nginx, Prometheus, Grafana, ELK Stack.
Internet Tools	Trello, PuTTY, Slack, Microsoft Teams, JIRA, Browsers (Chrome, Firefox, Edge), Confluence, draw.io, Lucidchart, Lens for Kubernetes, Asana, GitHub, GitLab, Bitbucket, Docker, Postman, Figma, Miro, Notion, Basecamp, Jira Service Desk.
Testing Tools	<p>Unit Testing Tools: Mockito (Spring), JUnit, TestNG, Jasmine, Karma, Jest, Mocha, Chai, Enzyme.</p> <p>Integration Testing Tools: Postman, Rest Assured, Cucumber, WireMock, Pact (Contract Testing), Apache JMeter, SoapUI.</p> <p>UI Testing Tools: Selenium, Cypress, Playwright, Appium, Robot Framework.</p> <p>CI/CD & Code Quality: GitHub Actions (CI/CD testing), SonarQube (for static code analysis).</p>
Other	Data Modelling, UML, ERDs, Software Proficiency, Microservices Architecture Design, Serverless Architecture, Behavior-Driven Development (BDD), Event-Driven Architecture (EDA), Domain-Driven Design (DDD), CQRS (Command Query Responsibility Segregation), API Design & Documentation (Swagger/ OpenAPI), Event Sourcing, Architectural Design Patterns (e.g., Circuit Breaker, Saga)

Functional Skills

Management and Leadership Skills	Ability to produce realistic software schedules, Project Management, Strategic/ Tactical Planning, Business Analysis and Development, Budgeting/Forecasting, and New Product Development
---	--

Professional Experience (In Reverse Chronological Sequence)

Organization Name	University of Central Missouri(UCMO)
Department	NETML Lab, Research Center
Project Name	User behaviour Detection using network packets. (CYBR)
Work Location	Innovation Parkway, lee summit, MO, USA
Project Description	Work on research work for identifying the user behaviour of working using their network packet headers and visualise it using python and R. Used LLM machine model to learn the behaviour (tokenised packets) to identify their identity if legitimate or an intruder.
Tools and Technology	Pycharm, R, LLM, Ollama, Mistral AI, Laama 3 ,ML models, Regression, Classification

Organization Name	Capgemini
Client Name	Virgin Voyages
Project Name	Identity and Security Management (Syncope)
Project Duration (From & To)	2 year (Aug/2021 to July/2023)
Role/Title	Consultant/B2
Work Location	Gurugram, Haryana (Client Location Florida)
Project Description	Worked with handling the Identity and security of the crew members using a open source product Syncope. Manage the module using the Kafka messaging queue to embark and debark the crew members in a Ship. Created micro services each with a single prospective and integrations using messaging queues.
Responsibilities	<ul style="list-style-type: none">• Micro-services Development & Maintenance: Developed and maintained micro-services workflows using spring boot and python, implementing functional testing with frameworks like JUnit and PowerMockito to detect functional changes. Utilised SAST, DAST, AVO, and OSS scans for vulnerability detection and resolution.• Agile Methodology & Task Management: Collaborated with developers to clarify tasks using Agile methodology and managed transparency through Rally boards.• Documentation & Monitoring: Documented workflows using Lucidchart, Swagger UI.

Responsibilities	<ul style="list-style-type: none"> • Cloud Deployment & Infrastructure: Deployed services on GCP using Helm charts and Terraform for Infrastructure as Code (IaC), leveraging GCP services like Vault, FaaS, and Kubernetes (K8s). • Data Science & Migration: Migrated modules to utilize Jupyter Notebooks for solutions and developed Python-based solutions for identity management, error handling, and report generation.
Tools	JIRA(Agile), IntelliJ, PyCharm, Jupyter Lab and Notebooks, Postman, Offset Explorer, Dbveaver
Software / Special Tools	Java 17, Spring 3.2 AWS services, JIRA, GITLab, Azure board, Lucid Charts, Apigee, Okta, Cypress
Languages	Java, Spring, HTML, CSS, Java Script, Bootstrap, TypeScript, Angular, React

Organization Name	Capgemini
Client Name	Baker Hughes (BH)
Project Name	Open JDK Migration – CSD
Project Duration (From & To)	9 months (May/2021 to Dec2021)
Role/Title	Consultant/B2
Work Location	Remote (Client Location - Atlanta, GA)
Project Description	<p><i>72 Java based services and applications that need to migrate to java 17 adopt open JDK or Amazon Corretto and bump the spring boot version to latest along with the changes in cloud migration.</i></p> <p><i>Major Services - Pilot, PHMD, Phantom, IKTV Dashboard, Advanced System, Conformity, Gate, Offbrilliantfactory, asset tracking, tools tracking.</i></p>
Responsibilities	<ul style="list-style-type: none"> • Application & Version Upgrades: Migrated applications to the latest Java version and conducted compatibility testing. Upgraded servers (Tomcat, JBoss) and Spring Boot services, resolving deprecated libraries and vulnerabilities. • Functional Testing & Scanning: Performed functional testing with JUnit and PowerMockito, ran SAST, DAST, AVO, OSS, and Fortify scans to identify and fix issues and test using Playwright. • Agile Development & Collaboration: Collaborated with developers using Agile methodology and managed tasks transparently through Rally boards. • Infrastructure & Cloud Migration: Worked with DevOps to migrate services from AWS to Azure and redesigned services to a serverless architecture. • UI & Frontend Updates: Implemented UI fixes and upgraded Angular and React versions for compatibility and performance improvements.

Organization Name	I-Tech s/w solutions
Client Name	Experian
Project Name	Credit Score and Fraud Detection System
Project Duration (From & To)	6 Months (Dec/2020- May/2021)
Role/Title	Senior Software Developer

Work Location	Bhopal, Madhya Pradesh
Project Description	<i>Java, Spring based Micro-services verifying the credit score of the user if eligible for Credit card. Services like Prequel to detect the limits and background history using intelligence and past history FICO score. Detecting any kind of Fraud within the system.</i>
Responsibilities	<ul style="list-style-type: none"> • API Development & Testing: Developed REST APIs and integrated them with the UI. Implemented functional testing with JUnit and PowerMockito, along with integration tests and BDD for system validation. • Team Management & Agile: Managed a team of 4 junior developers, clarifying tasks through Agile methodology and ensuring efficient collaboration. • CI/CD & Deployment: Set up CI/CD pipelines using Jenkins for continuous integration and deployed applications using Docker images on AWS Registry. • Monitoring & Security: Monitored service behaviour with the ELK stack and logging via Spring Sleuth. Managed Aurora RDS and DynamoDB for data storage, ensuring high-end security using Secret Manager, Kerberos, IAM roles, and token-based authentication.
Software / Special Tools	Java 11, AWS services, JIRA, GITLab, Azure Board, Offset Explorer, Dbveaver, IntelliJ, postman, VS code, Pycharm
Languages	Java, Spring , HTML, CSS, Java Script, Bootstrap, Type Script, Angular

Organization Name	Java R&D Pvt. Ltd. (I-Tech s/w solutions)
Client Name	Fannie Mae
Project Name	Orchestration Service
Project Duration (From & To)	6 Months (june/2020-Dec/2020)
Role/Title	Senior Software Developer
Work Location	Bhopal, Madhya Pradesh
Project Description	<i>Java based Micro-services to verify the property documents Services for rental housing in market along with the history using multi-part family business.</i>
Responsibilities	<ul style="list-style-type: none"> • API Development & Testing: Developed REST APIs and integrated them with the UI. Implemented functional testing with JUnit and PowerMockito, integration tests, and BDD for end-to-end system validation. • CI/CD & Deployment: Set up CI/CD pipelines with Jenkins for continuous integration and deployed applications using Docker images on AWS Registry. • Cloud & Serverless: Integrated AWS Lambda and serverless architecture for scalable and cost-efficient services. • Spring Boot & Multi-part Support: Leveraged Spring Boot for API development, including handling multi-part requests and efficient resource management.
Software / Special Tools	Java 11, AWS services, On-Prem Servers, JIRA, GITLab, Azure board
Languages	Java, Spring , HTML, CSS, Java Script, Bootstrap, Type Script, Angular, Python, NodeJs

Organization Name	IDEMIA Augmented Identity
Client Name	T-mobile ,Viettel
Project Name	Multi-IMSI
Project Duration (From & To in Month/Year Format)	6 months (june/2019 – jan/2020)
Role/Title	Software Developer
Work Location	Noida, Uttar Pradesh, India
Project Description	<i>SIM Card Applet allowing subscriber to switch carriers when the device move to new geographical area along with global IOT deployments.</i>
Responsibilities	<ul style="list-style-type: none"> • SIM Card Applet Development & Testing: Developed SIM card applets and performed basic testing by deploying to the SIM card. Conducted functional testing using UTE and implemented integration tests and BDD for system validation. • Monitoring & Optimization: Monitored service behavior with ELK stack and Spring Sleuth logging. Optimized code to fit within the limited memory constraints of the smart card (KBs). • Client Delivery & Analysis: Performed requirement analysis and ensured end-to-end delivery to clients.
Operating Systems	SIM Card OS (internal to syscom)
Hardware	Smart Card microprocessor
Software / Special Tools	Kanban, Sharepoint, SIMON, UTE – testing Environment
Languages	Java-card, Java, JavaFX, Swings

Organization Name	IDEMIA Augmented Identity
Client Name	Vonage
Project Name	IMEI Tracker
Project Duration (From & To in Month/Year Format)	3 months (jan/2019 – may/2019)
Role/Title	Software Developer
Work Location	Noida, Uttar Pradesh, India
Project Description	<i>SIM Card tracing the last received IMEI using its file system.</i>
Responsibilities	<ul style="list-style-type: none"> • Develop the SIM Card Applet along with the basic testing by deploying to SIM card. • Functional testing using frameworks like UTE to detect the functionality changes • Implementing the Integration test-case and BDD to test the complete system.
Operating Systems	SIM Card OS (internal to syscom)
Software / Special Tools	Kanban, Sharepoint, SIMON, UTE – testing Environment

Training and Seminars

- Research work : <https://netml.github.io/> (IEEE paper in progress)
- AWS Cloud Academy - 1 month

Certifications

Amazon Oct 2021 – Oct 2025

- Amazon Certified Associate Developer
https://www.credly.com/badges/2d42cb08-24c6-4050-ad21-cc71c65cf184/public_url

Scrum.io Nov 2021- Lifetime

- Professional Scrum Master
https://www.credly.com/badges/6418a8d6-7d38-4da9-809a-4cf969229494/public_url

<i>Prior Work Experience Details</i>				
<i>Organization's Name</i>	<i>Designation</i>	<i>Dates of Employment</i>		<i>Location (City & State)</i>
		<i>From (DD-MON-YYYY)</i>	<i>To (DD-MON-YYYY)</i>	
Capgemini	Consultant/B2	10 th May, 2021	August, 2023	Gurugram, Haryana
Java R&D Pvt Ltd	Senior Software Engineer	10 th Feb,2020	30 th April,2021	Bhopal, Madhya Pradesh
